INTERNSHIPS

SDE Intern — Jun 2026 – Present

Opptimise · Remote

- Rebuilt GitHub Actions CI with ephemeral PostgreSQL containers, cutting PR checks from 22 to under 7 minutes.
- Reduced AI coaching time-to-first-token from 5.2s to 280ms using SSE streaming and Deepgram voice output.
- Fixed Django scoring resolution and cache invalidation, aligning dashboard calculations with generated PDF reports.
- Automated AWS staging shutdowns using EventBridge and Lambda, cutting monthly runtime from 720 to 240 hours.

Frontend Developer Intern — Feb 2026 – May 2026

Bharatiya Drishya · Remote

- Engineered an interactive 3D ring viewer in React and WebGi, integrating the complete ring model into the interface.
- Implemented real-time customization controls for changing ring colors and materials across the 3D model.
- Optimized 3D assets and rendering workloads to support smooth interaction on low-end laptops and devices.
- Built responsive controls and layouts to keep ring customization accessible across different screen sizes.

PROJECTS

Career OS – AI Agent Platform — app.kinetixsolutions.dev

- Built THEA, an AI agent that reasons over profile context and executes tools to directly edit resume content.
- Developed an OAuth 2.1/PKCE-secured MCP server so external AI clients can invoke platform tools.
- Integrated streaming LLM responses, provider fallback routing, evidence-grounded context, and readiness diagnostics.

Tech Stack: JavaScript, Node.js, LLMs, MCP, OAuth 2.1, SSE

VH Gems & Jewels – 3D Jewelry Platform — vijayhandajewllers.com

- Built a responsive React storefront for a jewelry brand, structuring reusable UI components and product pages.
- Integrated interactive product presentation with ring rotation, detailed previews, and customer-driven customization.
- Connected frontend workflows with backend APIs for cart, checkout, and order management.

Tech Stack: React, Vite, JavaScript, WebGi SDK, WebGL
